DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 17-26, 28-43, 45-50, 59-69, 71-74, 83-92 and 94-118 are rejected under 35 U.S.C. 102(b) as being anticipated by Northington et al (US Patent No. 6,128,602).

As per claims 17-26, and 28-43, 45-50, 59-67, 69, 71-74, 83-92 and 95-118, Northington et al disclose a system and method of making financial transaction information available electronically to remote client terminals. The system and method comprise receiving financial transaction data for a plurality of distinct financial transactions; determining a unique identifier for each distinct financial transaction and a client associated with each distinct financial transaction; determining as a function of each unique identifier whether the associated client has consented to receiving the respective financial data electronically and if it is determined that the associated client electronically. Applicant is directed to column 7, line 44 to column 8, line 40 of Northington et al. Northington et al also teach suppressing transmission of a paper based version of the consented respective financial data, sending an E-mail message directly to an E-mail address of the associated client which may be for incorporation into a financial software program (applicant is referring to column 10, lines 56 to 65, column 11, lines 4-10, column 5, lines 15-29). The client system and the server system communicate with one

another over a secure connection via the Internet. The system performs comparison of logins, passwords and reconciliation of stored information with inputted information. See column 14, lines 11-23 and column 6, lines 52-64 of Northington et al..

As per claims 28-29, 68 and 94, applicant is referring to column 9, lines 24-41 and 64-67.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 27, 44, 70 and 93 are rejected under 35 U.S.C. 103(a) as being unpatentable over Northington et al. (US Patent No. 6,128,602).

The teachings of Northington et al. are discussed above. As per claims 27, 44, 70, 93 Northington et al do not explicitly teach the step of maintaining a record of each sent E-mail message that does not successfully reach its intended E-mail destination. However, Northington et al teach sending E-mail to client terminals. Also, most E-mail systems have an automatic features of identifying E-mails that are not read, open or reached a destination. Incorporating such a feature in the system of Northington et al. would have been obvious to one of ordinary skill in the art in order to determine alternate means of communicating requested information to a requester. If a recipient has failed to receive an E-mail message, sending a paper-based representation of the financial transaction data associated with each unsuccessfully sent E-mail

message would have been obvious to one of ordinary skill in the art to do in the system of Northington et al in order to assure that the requester does receive the requested information.
